AI Engineer for Data Scientists Associate

Jhon Deiby Mejias

AI & Data Analytics | Python, SQL, AWS | Turning Data into Business Solutions | Systems Engineering & Business Administration

Cali, Valle del Cauca, Colombia

Extracto

I am a Computer Systems Engineering and Business Administration student focused on Artificial Intelligence, Machine Learning, Data Analytics, and Cloud Computing. My background combines technical development with a business-oriented perspective, allowing me to understand both how technological solutions are built and how they can generate value for organizations. I have experience in frontend development using React, JavaScript, HTML, CSS, Git, and REST APIs, as well as academic experience supporting data analytics, finance, and marketing learning processes at Pontificia Universidad Javeriana Cali. I am currently developing end-to-end projects involving Python, SQL, machine learning models, data visualization, APIs, and cloud deployment. My goal is to create practical AI and data solutions that support decision-making and solve real business problems. I am open to internship and junior opportunities in Artificial Intelligence, Machine Learning, Data Analytics, Data Science, and Cloud Computing. GitHub: <https://github.com/jdmejias>

Experiencia

Creceer Capital

Frontend Developer Intern

junio de 2026 - julio de 2026 (2 meses)

Medellín

Developed responsive web interfaces using React.js, JavaScript, HTML5, and CSS3. Worked in an Agile Scrum environment, using Git and REST APIs to implement new features and enhance application performance and user experience. Internship successfully completed.
